

# BIOCHAR WORKSHOP

Biochar is high quality charcoal that can be used as a soil amendment to create a healthier environment for plants and microorganisms, while at the same time sequestering carbon. Come and learn more about this innovative use of a wood-burning by-product, and get some hands-on experience using it in the garden.

**When:** Saturday, November 3, 2012 - 3pm to 5pm

**Where:** Dufferin Grove Park, 875 Dufferin Avenue  
(zamboni garage on the south side of the rinkhouse, and outside)

**RSVP:** [gardens@dufferinpark.ca](mailto:gardens@dufferinpark.ca)

\*Please wear boots and clothing appropriate for the weather, and for digging/light gardening work if you want to take part in the hands-on demonstrations. Tools and gloves provided.
